Dear Hiring Manager,

I am writing to express my interest in the Summer Analyst position at Goldman Sachs in Warsaw. As a Software Engineering student at Bahir Dar University, I am excited about the opportunity to immerse myself in a dynamic environment that focuses on innovative problem solving. My background in software development and my experience in machine learning make me an ideal candidate for this role.

During my recent internship as a Backend Developer at Helder Technologies, I led the backend development using Node.js and Laravel, and built secure RESTful APIs. This experience taught me how to solve engineering problems creatively and think strategically, skills that align well with the goals of your Engineering Division. Additionally, my internship as a Machine Learning Intern at DevTech involved developing and deploying machine learning models which improved prediction accuracy by 20%. I believe that my strong technical foundation and experience with big data can contribute significantly to the ongoing projects at Goldman Sachs.

I am particularly excited about the opportunity to work at Goldman Sachs because of its emphasis on building scalable software solutions and leveraging machine learning alongside financial engineering. I admire how your teams tackle complex challenges and transform finance. I am eager to collaborate with creative thinkers and contribute to projects that create new businesses and improve efficiency within the company.

In conclusion, my hands on experience and eagerness to learn position me as a strong candidate for the Summer Analyst role. I look forward to discussing how my background and skills can be an asset to your team. Thank you for considering my application.
